The hat worn by Napoleon Bonaparte at the Battle of Austerlitz was sold in Paris last week. Documents proving its genuineness accompanied it.

Nothing is too good for the Earl of Beaconsfield just now. When he went to Osborn, the other day, to visit the Queen; he traveled in one of the royal saloon carriages the Superintendent of the line drove the train as he does when the Queen travels, and the platforms in Victoria Station were covered with crimson cloth. No wonder Mr. Gladstone is disturbed.

There is in London a house where a terrier dog is kept—the exact house is not indicated. One day the owner of the house (which has a high wall around it) bought a lively monkey and brought him home, dressed in hat, coat and breeches. The dog saw him sitting on the terrace in the yard and started for him. When he got within a few feet the monkey sat so still and unconcerned that the dog was frightened. He also sat down, and for a minute or two they glared at each other. The dog was thinking of renewing the attack, when the monkey lifted his hat and bowed politely to him. This was too much for the dog and he took refuge under the porch. As soon as he was gone the monkey, who was really as much frightened as the dog, made lightning tracks up a tree.

WORKINGMEN'S PLATFORM.

RESOLVED, 1st. That self-preservation be the first law of nature, the principle applies to governments as to individuals.

2d. That the existence of the Chinese in the United States is detrimental and injurious to the present and future welfare of our country, and therefore the people demand the abrogation of that part of the Burlingame treaty permitting immigration of the Chinese.

3d. That the Chinese be taxed a per capita tax of one hundred dollars per annum for the purpose of creating a fund to prosecute and defend Chinese suits at law.

4th. That no Chinese shall be employed for wages upon any public works, and that no Chinese shall be employed by any public officer in, around or upon any public building.

5th. That the Workingmen's party is unopposed to all land monopoly.

6th. That the Government subsidize of land to any corporate bodies, associations or individuals, be void in principle and injurious and detrimental to the future growth and prosperity of our country.

7th. That all Government land should be held in trust for the actual settler.

8th. That all State and Government work should be done by the day.

9th. That the Central Pacific Railroad was built with Government aid, therefore a law should be passed to the effect that no discrimination shall be made in freight or fares for or against any town, village or place.

10th. That all lands or property, whether belonging to railroad or other corporate bodies, to associations or individuals, whether improved or otherwise shall be assessed at full cash value, and all unimproved lands shall be assessed at the same rate of taxation as adjoining improved lands.

11th. That all Government bonds be taxed for their full cash value the same as other property.

12th. That gold, silver and currency of the United States shall be a legal tender for all taxes and dues, both public and private, and for Government, State and corporate bodies. Special contract laws affecting the legal tender of gold, silver or currency must be abolished.

13th. That the President and Vice President of the United States be elected by a direct vote of the people.

14th. That all salaries and fees of the State and County officers shall be so equalized as to conform to the best interests of the people.

15th. That the Workingmen's party will not support for office any candidate who will not publicly and unqualifiedly pledge himself to support the Bullion Tax law as it now stands.

16th. That in all nominations the Jeffersonian principle "Is he honest? Is he capable?" shall be a criterion by which to be guided, and that all candidates shall be of good moral character and standing.

17th. That all nominations of the party shall be made with open doors but that no persons other than members of the party shall have any voice in the proceedings thereof.

18th. That the United States Congress and the Legislature of Nevada should pass laws punishing speculation, stealing or malfeasance in office by any officer, appointed or elected, an unpardonable crime.

19th. That all legislation should be for the equal protection of Labor and Capital. All laws giving special privileges and powers to Banking or Railroad corporations or other monopolies in their nature or effect injurious to the interest of the workingmen, should be repealed.

20th. That Railroads, Canals and Mines are public works and that Chinese should be by law prohibited from working on them.

THE DAILY JOURNAL

Is the best daily paper published on the line of the Central Pacific Railroad, east of Sacramento, and having a general circulation throughout the State. It is especially valuable as an advertising medium.

THE DAILY AND WEEKLY JOURNAL have a combined circulation larger than that of any interior journal of Nevada, excepting those of the Comstock.

NEWS OF THE MORNING.

Butler denies that the Sherman letter has been found.

San Francisco will enforce all its ordinances to ensure health.

The Monetary Commission expect to complete their labors to-day.

Philip Arnold, the Arizona diamond salter was shot in a Louisville barroom row.

A determined effort is being made to wrest the control of the stock market from the Nevada Block.

BEECHER AND THE PRESS.

We would feel like exercising a wide latitude of charity towards Mr. Beecher, should he retrace his steps homeward by the route over which he came, and, armed with a loaded club, brain every "localities" ass that has brayed at him. We consider it almost a national disgrace that the press of the country can't be civil to our representative men, especially when their insults are solely due to a spirit of malicious blackguardism. Mr. Beecher is a fit subject for criticism, but there is a difference between criticism and blackguardism that is fitting only for libertines and courtesans.

We commend the above, which we clip from the Nevada Herald, to some of our cotems. Some newspapers have got some little things to learn before they occupy a decent place in journalism.

Or connce you deny the claim, but the top of a wagon-wheel moves faster than the bottom for all that. This you can ascertain by cutting out a circle from cardboard, finding the true center, and marking off the spokes in pencil. Pin this imaginary wheel through its center to a board, move it around, and if you have a rule to measure with you will soon convince yourself that the upper part of the wheel will move over a considerably greater distance in a given time than the lower part will.

The public debt of Europe was divided as follows in 1876: France, \$1,637,921,400; Prussia, \$239,852,375; Italy, \$2,650,000,000; Russia, \$1,254,910,000; Spain, \$2,650,000,000; Turkey, \$927,000,000; Great Britain, \$3,834,852,721. These are the heaviest, and they bear hardest on Turkey, Italy, Russia and Spain. While some of the debts may have slightly decreased in the last two years, others have greatly increased, as in the cases of Russia and Turkey.

The term horse-power, as applied to a steam engine, is a measure by which the capacity of engines is rated, established by Boulton and Watt at 33,000 lbs raised one foot high per minute. On this basis Watt reckoned the force of his steam engine, and the term has continued in use for want of a better one. The measure is a mere conventional unit, suggesting an actual comparative estimate of the power of engines.

The Republican County Central Committee of Ormsby county met in Carson last Saturday and apportioned delegates to the State and County Conventions, established tests, and fixed the time for holding the primary elections and County Convention. The delegates will be chosen separately at Carson and Empire. The primary elections will be held on the 10th of September and the County Convention on the 13th.

The Russian headquarters have been transferred from San Stefano to Rodosto. The Consul at Adrianople reports that the Bulgarians continue to plunder and outrage Musulmans. The Greek Archbishop has communicated to the Consul details of the most horrible atrocities.

The Silver State says the Fairmount mill was steamed up and the whistle blown for the first time last Saturday. We are informed that that roasting furnaces will be built before the mill commences crushing ore.

The Battle Mountain Messenger, which was burned out recently, will resume publication on Saturday.

NATIONAL BANKS.

Shall the present system of National Banks be continued? This will be a leading question before the next Congress. It is very evident that the manifesto put forth by the bankers at their recent meeting has had the opposite effect from what was intended. The Nationals have been supplied by their opponents with new weapons and they are using them to the best advantage. It is evident that the people of many of the Eastern States have come to regard the bankers as the authors of much of the present financial depression and misery of laboring men, and with this idea to start with are devising means by which the bankers may be deprived of their power. And looking this question squarely in the face, there does not seem to be any good reason why some men should be favored above others by the laws. Money can be had in New York at 6 and 7 per cent. of private loaners, but the National Banks are able to collect about 13 per cent. They deposited one hundred thousand dollars in government bonds with the U. S. Treasury and issue on this ninety thousand in currency. On the bonds they draw \$5,250 interest and this is free from every form of taxation, and then they loan the ninety thousand and use it in discounting bills, making an average of \$8,000 per annum more, being a total of over \$13,000 income from \$100,000. The Nationals claim that this money can just as well be issued by the Government direct to the people, thereby saving one interest and freeing business from the over shadowing control of a few Shylocks. It seems that the new party is rapidly growing, has in its ranks many able men and promises to elect four Congressmen in New York, from four to six in Ohio and two or three in Maine. Mr. Blaine flirts for the first time since he took the reins in the Pine Tree State, that he is not able to control the people. Mr. Conkling is very much alarmed at his own prospects in New York, and in Pennsylvania the Camerons do not understand the movements they see. The Nationals are secret in all their movements, and so well have they succeeded in hiding their members that little is known about them. The fight over the banks will be a bitter one, for these rich institutions will die hard. A full discussion of the question should be had.

HIFALUTIN NAMES.

The habit of doting parents calling their infants by some high flown grandiloquent name is a reprehensible one. The Father of his Country would be sorry he was born if he knew how many George Washingtons have lied and served a term in prison. Abraham Lincoln would wish he had continued to split rails if he could witness the droves of little darkeys down South who sport his name, and regret he ever became their emancipator. So with Jefferson, Webster, Franklin, and we almost added Beecher. It's a mistake. No doubt fond parents hope their little ones will astonish the world some day; but if he should do so any new name will sound just as grand. Try Tom, William, or any of the other good commonplace names. Tom Edison has as much glory as if his name had been George Washington Andrew Jackson Abraham Lincoln et al Edison.

Egypt, Chaldea and China first extended the limits of agriculture in ancient times. Animal power in the cultivation of the soil is supposed first to have been applied in these countries. As evidence of this, we find inscriptions on the ancient tombs of Egypt. Among them is the representation of an implement resembling a pick, which was used as a plow. Greece received its knowledge of agriculture from Egypt. Hesiod describes the plow of that day as consisting of a beam, share and handles not as perfect even as the famous Webster plow, which is still preserved at the New Hampshire Agricultural College. Even this is far behind the modern field cultivator. The early Spartans possessed a knowledge of draining. The site of their city was surrounded by swamps and marshes, which must have been drained before the city could have been inhabited. The art of paving gradually advanced in Greece until it attained a high degree of perfection.

Captain T. G. Taylor, for eight years Superintendent of the Yellow Jacket mine, will resign his position September 1st. He will be succeeded by I. E. James. Mr. James is thoroughly competent to fill the position.

A COMPROMISE

No Contest at the Republican Primaries.

We understand that the friends of General Connor and Mr. Wren, in order to avoid a contest in the Republican primaries in this county, have agreed at the friends of Mr. Wren shall select the fifteen delegates to the State Convention; five of them to be joint friends of Connor and Wren, the other ten to be chosen as the personal and political friends of Mr. Wren, with the understanding that they will, if possible, secure his nomination. They are not to be enemies of General Connor, but are to be at liberty to vote according to their preferences for Governor. It was further understood that the nomination for Congressman should be first made, if possible. This can be no doubt that it will insure harmony in the Republican party in this county this Fall, and in its bearing upon the contest is second in importance to the gubernatorial candidates of Storey county.—Eureka Leader.

AND here is a paralyzing argument by the Graphic of recent date: "The attention of James Gordon Bennett is respectfully invited to the fact that a fool of a very malignant type has invaded the columns of the Herald. In a leading editorial this morning he alludes twice to the silver dollar as being 'worth only 80 cents.' Now, we believe this silver dollar to be worth 100 cents. To test this question, which is right, we will pay 99 cents each for all the new silver dollars Mr. Bennett will deliver at the office of the Graphic. If they are worth only 80 cents, Mr. Bennett will make 11 cents on every dollar; or \$11 on every \$100; or \$110,000 on every million. Mr. Bennett could effect the transfer of this last amount within a week, and it would be a profitable week's work. Let him either hand off his financial fool, or else accept our offer; either put up or shut up."

A BIG GRASSHOPPER.—The Stockton (Cal) Independent tells about the boss grasshopper as follows:

The most monstrous grasshopper we have ever seen is on exhibition at the office of F. M. West, County Treasurer. It is preserved in alcohol, and was captured some time since near Copperopolis. It is nearly six inches long, and its body is an inch and a quarter in depth, while its head is as big as a man's thumb. The wings when spread must have measured ten inches from tip to tip. The legs are as large as a lead pencil at the body, and about four or five inches long. The enormous body is quite translucent, and its ribs can be distinctly seen.

AFTER this local of the Ogden Freeman ought to be spanked and put in his little bed. Hear him:

There is a pocket telephone stretched across from the house of a young man on Corinne street, near Young, to the window of his sweetheart just opposite. They are to be married next month, and it is a touching sight to watch the little birds perch on the string and peck at the taffy as it slides along between their toes.

The diphtheria has run itself out in Mendocino county. The people are glad that it has subsided. The Ukiah Dispatch gives the following as a specimen of its ravages: The Walker Valley school district last year contained seventeen school children. Some months ago diphtheria broke out in the valley, and to-day but five of the seventeen remain.
